

About dolls

Arte Tokio Real-size Silicone Seamless Dolls are original real-size seamless/sex dolls with special silicone skin and the original special frame structure.

A more realistic touch has been achieved by using our original special blended silicone for the skin. Our original special sponge has been inserted in the bust for a soft touch. You will be surprised by the softness. Our originally developed special structure is used for the frame. The frame structure provides movement close to that of a human, and the legs can be opened 130 degrees. Detailed angles of movement are possible by the moveable joints.

Joints in the movable parts of this product can be bent freely, and various poses are possible. And, the hole can also be inserted and removed.

* Forced spreading and pressure, bending outside the movable range, and keeping improper postures for a prolonged period places great pressure on the silicone and may cause wrinkles or rupture.

【Spec】 132cm Size Doll

●Height: 132cm Weight: 16kg B-W-H: 57.5cm-51cm-65cm Shoe size: 21cm

【Spec】 161cm Size Doll
